2. AWS Cloud Virtual Internship by Eduskills.
3. Tata Data Visualisation: Empowering Business with Effective Insights from Forage
4. Python Essentials and Introduction to Cybersecurity Trainings from Cisco
5. Full stack Development using MERN stack Internship by EY &AICTE

PROJECTS

1. Email Builder Web Application

Developed a full-stack web application called "Email Builder" to streamline the creation of custom email templates for marketing and customer engagement. The application enables non-technical users to build and edit professional email layouts with ease.

- Built a dynamic and interactive user interface using React.js.
- Implemented an editor to fetch and display the base email layout, allowing users to customize fields such as title, content, and footer.
- Integrated file upload functionality for adding images to email templates.
- Added advanced customization options such as text alignment, color selection, and font size adjustments.
- Built and deployed RESTful APIs using Node.js

2. College Placement & Career Guidance Portal

A web-based platform streamlining student recruitment, admin management, and recruiter access for efficient placements.
Features:
- Students: Upload resumes, access job listings, and receive career guidance.
- Admins: Manage job postings, shortlist candidates, and send notifications.
- Recruiters: Browse student profiles, post job openings, and shortlist candidates.

Tech Stack: React.js, Node.js, Express.js, MongoDB, JWT Authentication
Outcome: Improved placement efficiency, automated hiring processes, and enhanced student engagement.
